BEA 07-27

Christopher L. Bach: 606-9545 (Revisions)

U.S. International Transactions: First Quarter 2007

Current Account

The U.S. current-account deficit--the combined balances on trade in goods and services, income, and net unilateral current transfers--increased to \$192.6 billion (preliminary) in the first quarter of 2007 from \$187.9 billion (revised) in the fourth quarter of 2006. The increase was more than accounted for by an increase in net unilateral current transfers to foreigners. In addition, the deficit on goods increased a small amount. These increases were partly offset by small increases in the surpluses on services and on income.

Goods and services

The deficit on goods and services decreased slightly to \$176.8 billion in the first quarter from \$176.9 billion in the fourth.

Goods The deficit on goods increased to \$200.9 billion in the first quarter from \$200.3 billion in the fourth.

Goods exports increased to \$270.1 billion from \$266.5 billion. The largest increases were in consumer goods, in agricultural products, and in automotive vehicles, parts, and engines.

NOTE: This news release is available on BEA's Web site at www.bea.gov/newsreleases/rels.htm.

The estimates of the international transactions accounts released today have been updated and revised to reflect newly available source data and a methodological change. The major improvements this year include new and comprehensive estimates of transactions in financial derivatives, a new methodology for estimating interest received and paid on bonds, and the incorporation of results of the U.S. Treasury Department's annual survey of securities claims for December 2005 and of securities liabilities for June 2005 (revised) and 2006. The incorporation of these results and other newly available source data led to significant improvements in the estimates of services receipts and services payments, income receipts and income payments, and financial flows for U.S.-owned assets abroad and foreign-owned assets in the United States. Also, the geographic detail of the accounts is now presented in an expanded format for several earlier years. (See the section on "Revisions" on page 5 of this release.)

The July *Survey of Current Business* will contain detailed tables and an article describing revisions to the international transactions accounts and to the international investment position accounts. Also, a news release on June 28 will present BEA's preliminary estimates for 2006 and revised estimates for 2003-2005 of the U.S. net international investment position.

Goods imports increased to \$471.0 billion from \$466.8 billion. The increase largely resulted from an increase in petroleum and products. Among nonpetroleum products, increases in capital goods, in consumer goods, and in foods, feeds, and beverages were mostly offset by decreases in other major commodity categories.

Services The surplus on services increased to \$24.1 billion in the first quarter from \$23.4 billion in the fourth.

Services receipts increased to \$112.8 billion from \$111.1 billion. The increase was largely accounted for by increases in "other" private services (such as business, professional, and technical services, insurance services, and financial services), in travel, and in royalties and license fees.

Services payments increased to \$88.7 billion from \$87.7 billion. The increase was largely accounted for by increases in "other" private services, in direct defense expenditures, and in passenger fares.

Income

The surplus on income increased to \$10.4 billion in the first quarter from \$9.7 billion in the fourth.

Investment income Income receipts on U.S.-owned assets abroad increased to \$176.8 billion from \$172.3 billion. The increase was largely accounted for by an increase in “other” private receipts (which consists of interest and dividends).

Income payments on foreign-owned assets in the United States increased to \$164.8 billion from \$161.0 billion. Increases in “other” private payments (which consists of interest and dividends) and in U.S. Government payments (which consists of interest) were partly offset by a decrease in direct investment payments.

Compensation of employees Receipts for compensation of U.S. workers abroad were virtually unchanged at \$0.7 billion, and payments for compensation of foreign workers in the United States were virtually unchanged at \$2.4 billion.

Unilateral current transfers

Net unilateral current transfers to foreigners were \$26.1 billion in the first quarter, up from \$20.7 billion in the fourth. The increase resulted from increases in U.S. Government grants, mostly to the Middle East, and in private remittances and other transfers.

Capital Account

Net capital account payments (outflows) were virtually unchanged at \$0.6 billion in the first quarter.

Financial Account

Net financial inflows--net acquisitions by foreign residents of assets in the United States less net acquisitions by U.S. residents of assets abroad--were \$202.8 billion in the first quarter, down from \$225.2 billion in the fourth. Net acquisitions by U.S. residents picked up more than net acquisitions by foreign residents.

U.S.-owned assets abroad

U.S.-owned assets abroad increased \$420.8 billion in the first quarter, following an increase of \$289.0 billion in the fourth.

U.S. claims on foreigners reported by U.S. banks increased \$233.0 billion in the first quarter, following an increase of \$123.9 billion in the fourth.

Net U.S. purchases of foreign securities were \$87.7 billion in the first quarter, down from \$117.2 billion in the fourth. Net U.S. purchases of foreign stocks were \$43.5 billion, down from \$62.7 billion. Net U.S. purchases of foreign bonds were \$44.2 billion, down from \$54.5 billion.

Net financial flows for U.S. direct investment abroad were \$75.5 billion in the first quarter, up from \$66.1 billion in the fourth. A pickup in net equity capital investment abroad was partly offset by a larger decrease in net intercompany debt investment abroad and a slowdown in reinvested earnings.

U.S. official reserve assets increased \$0.1 billion in the first quarter, following a decrease of \$1.4 billion in the fourth.

Foreign-owned assets in the United States

Foreign-owned assets in the United States increased \$623.6 billion in the first quarter, following an increase of \$516.0 billion in the fourth.

U.S. liabilities to foreigners reported by U.S. banks increased \$203.8 billion in the first quarter, following an increase of \$172.3 billion in the fourth.

Net purchases by foreigners of U.S. Treasury securities were \$45.6 billion in the first quarter, up from \$22.1 billion in the fourth.

Net purchases by foreigners of U.S. securities other than U.S. Treasury securities were \$123.4 billion in the first quarter, down from \$132.7 billion in the fourth. Net purchases by foreigners of U.S. stocks were \$49.1 billion, up from \$26.6 billion. Net purchases by foreigners of U.S. corporate bonds were \$102.1 billion, down from \$112.2 billion. Net sales by foreigners of federally sponsored agency bonds were \$27.7 billion, up from \$6.1 billion.

Net financial flows for foreign direct investment in the United States were \$23.5 billion in the first quarter, down from \$45.6 billion in the fourth. A shift from an increase to a decrease in net intercompany debt investment in the United States and a slowdown in net equity capital investment in the United States were partly offset by a pickup in reinvested earnings.

Foreign official assets in the United States increased \$147.8 billion in the first quarter, following an increase of \$85.3 billion in the fourth.

Transactions in U.S. currency shifted to net shipments to the United States of \$1.6 billion in the first quarter from net shipments to foreign countries of \$8.4 billion in the fourth.

The statistical discrepancy--errors and omissions in recorded transactions--was a negative \$9.6 billion in the first quarter, compared with a negative \$36.6 billion in the fourth.

In the first quarter, the U.S. dollar appreciated less than 1 percent on a trade-weighted quarterly average basis against a group of 7 major currencies.

Revisions

As is customary each June, estimates of U.S. international transactions are updated and revised to incorporate newly available source data and improved estimating methodologies. The major changes this year are summarized below.

- New and comprehensive estimates of transactions in financial derivatives are introduced for 2006.
- A new methodology is introduced for 2001-2006 for estimating interest received on U.S. holdings of foreign bonds and interest paid on foreign holdings of U.S. corporate bonds, U.S. agency bonds, and U.S. Treasury bonds.
- The geographic detail of the accounts is presented in an expanded format for 1999-2004; the new estimates extend to these years the same format that was introduced last year for 2005-2006. Separate estimates are now presented for Asia, for Africa, and for the Middle East; for additional countries in Asia; and for additional countries in Latin America. Some European countries previously published annually are now published quarterly. New country groupings are now presented within Europe and include first-time estimates for the euro area. (See BEA's Web site at www.bea.gov/international/bp_web for more details.)
- Goods export and goods import end-use commodity classification codes have been updated for 2004-2006 to incorporate revisions made by the World Customs Organization to the international Harmonized System of commodity classification codes.
- Interest receipts for foreign bonds and dividend receipts for foreign stocks are revised for 2005-2006 to incorporate results of the U.S. Treasury Department's annual survey of securities claims for December 2005.
- Interest payments for U.S. corporate bonds, U.S. Treasury bonds, and U.S. agency bonds and dividend payments for U.S. stocks are revised for 2004-2006 to incorporate results from the U.S. Treasury Department's annual surveys of securities liabilities for June 2005 (revised) and for June 2006.
- The statistical adjustment for re-valuing some goods imports of computer software from media to full value has been updated for 1997-2006.

Revised estimates for the detailed components of the U.S. international transactions accounts for 2005-2006 are shown in table 1. Summary information on revisions for 1997-2006 is shown in table 2.

Preliminary estimates for 2006 and revised estimates for 2003-2005 for the U.S. net international investment position will be presented in a news release on June 28.

The fourth-quarter 2006 international transactions are revised from previously published estimates. Revisions reflect both newly available source data for the fourth quarter and changes from all of the above sources of revision. The current-account deficit was revised to \$187.9 billion from \$195.8 billion. The goods deficit was revised to \$200.3 billion from \$197.9 billion; the services surplus was revised to \$23.4 billion from \$19.4 billion; the surplus on income was revised to \$9.7 billion from \$3.0 billion; and unilateral current transfers were revised to net outflows of \$20.7 billion from \$20.2 billion. Net financial inflows were revised to \$225.2 billion from \$164.6 billion
